

Personal Scripts

Warning

Do NOT put any sensitive code here as this folder is linked to your dotfiles!

Implementation Rules

All program filenames must start with mnf, for example, a program which creates my daily note would be named mnf-daily.sh or mnf-daily.py or just mnf-daily.

XDG Spec verses This Folder

I spent about 45 minutes of my life debating between storing my personal scripts in ~/bin or ~/.local/bin. I decided on ~/bin because it will be more likely I will check in on it as it is not hidden. See this reddit discussion for a debate: [https://www.reddit.com/r/linuxmasterrace/comments/1f8nfnd/when_you_use_bin_instead_of_localbin_for_your/](https://www.reddit.com/r/linuxmasterrace/comments/1f8nfnd/when_you_use_bin_instead_of_localbin_for_your/)
